Suitable protection equipment must be worn each time you practise off-road motor sports.  
This protection equipment must be CE-rated and certified. You must wear a helmet, boots and back protection gear, as well as knee and elbow protectors.  
Textile-based items such as pants, jerseys, jackets and gloves are additional items worn so you can practice the sport with ease. They cannot be considered under any circumstances as personal protection equipment.  
Protection equipment must be worn each time and must be properly fitted. An adult must ensure these safety recommendations are followed if the equipment is being used by a child. This equipment is designed solely for off-road sports and cannot be used for street riding.

# **PERFORMANCE** HELMET

Boasting a special **ERT®** system and packed with technical innovations, the new **PERFORMANCE** helmet keeps you as safe as possible while delivering an unparalleled rider experience.

Made from soft, ultra-aerated polymer foam.  
For a perfect fit and better temperature regulation.  
The **ERT®** system is also more comfortable.

A safer helmet.  
Reduction of linear and oblique impacts.

The **ERT®** system is integrated between the helmet's EPS and inner lining.

Patented Energy Reduction Technology – **ERT®** – is the latest protection gear technology for motor sports helmets. It is a supple, aerated polymer layer between the helmet's EPS and inner lining.

Providing enhanced protection gear from linear and oblique impacts, this revolutionary material delivers outstanding results in terms of shock absorption.

The combination of the EPS and the **ERT®** system keeps you safer than ever before.

The **ERT®** system is, by its very nature, far more breathable than competing products on the market. It also makes your helmet more comfortable to wear.

# PERFORMANCE

The **PERFORMANCE** helmet is probably the revelation of the 2024/2025 season for motocross/enduro helmets. It delivers a level of protection gear, comfort and style unrivalled by any other product on the market in its price range. Certified ECE 22.06 and equipped with the latest Energy Reduction Technology (**ERT®**), this helmet is the perfect combination of technical prowess and performance.

**NEW**

**CE**

**ECE 22.06**

**ERT**  
ENERGY REDUCTION TECHNOLOGY

- Helmet with an injection-moulded shell
- Streamlined peak fully integrated into the shell with a seamless connection
- Ultra-flexible peak fastened with clips (no screws)
- Energy Reduction Technology (ERT® ) system for greater protection gear against oblique and linear impacts in addition to improved comfort and ventilation
- A two-part liner to optimise shock absorption, combined with the ERT® system
- Fully removable and washable super-soft lining
- Several air vents for excellent ventilation
- Nose guard included
- Adjustable double D-ring chin strap
- Weight: 1,259g (+/- 50g)
- Certified: ECE 22.06

**PERFORMANCE**  
HELMET

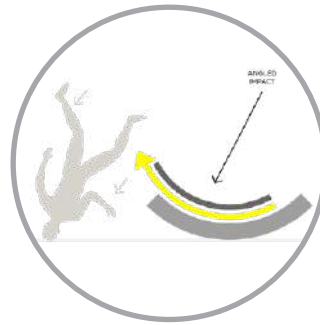

This **PERFORMANCE** helmet is equipped with the *Mips®* security system. It uses a technology that improves rider safety in the event of a range of accidents.

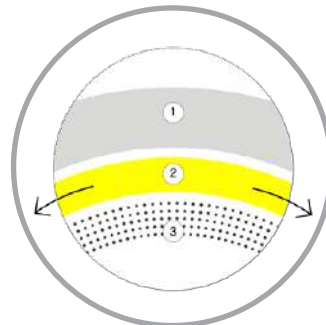

## Mips

## Safety for helmets

The low-friction layer can reduce the rotational force of oblique impacts.

The *Mips*® system imitates the brain's own protection gear system, providing protection gear from rotational motion.

- 1- Helmet
- 2- *Mips*® system
- 3- EPS layer

The brain is generally more sensitive to rotational motion than linear motion because it has shear properties similar to water or gel. When different parts of the brain move relative to each other as a result of rotational motion, the tissues can stretch, which can cause concussion or other brain injuries.

Rotational motion is a common cause of more serious concussions and brain injuries that are the result of oblique knocks to the head. The *Mips*® security system consists of a low-friction layer installed inside the helmet. The low-friction layer is designed to move slightly inside the helmet in the event of an impact, to help redirect impact forces away from the head. This helps reduce the risk of brain injury.

## PERFORMANCE

The first-generation **PERFORMANCE** motocross/enduro helmet is a sound investment. The comfortable and stylish helmet **PERFORMANCE** is certified ECE 22.06 and equipped with the **Mips®** system to absorb the force of oblique impacts. At this price, it's a must-have for any rider, whether you're a hobbyist or an expert!

# EVASION

The **EVASION** helmet is an ECE 22.06-certified jet model with two shields and a small removable peak. This helmet is particularly suitable for quad biking but is also versatile enough to be used on-road on a small- or medium-sized bike.

Understated and comfortable, this easy-to-use and easy-to-maintain model will be a welcome addition to your more technical helmets. You'll be especially pleased to have it to hand in hotter months.

Essense

Comfort

Breathable

With its raglan cut and breathable stretch panels – one of which covers the whole back – the **TITANIUM** jersey is the perfect choice for both enduro and motocross riders. This jersey ticks all the boxes of our demanding sport: it is highly durable thanks to the polyesters it is made from and it delivers exceptional freedom of movement.

**JERSEY**  
SIZES:

S>3XL

- Raglan cut
- Highly technical elasticated fabric for optimum comfort
- Plenty of breathable panels for improved ventilation
- 100% polyester
- Sublimation printed
- Hemmed at the bottom
- Lycra cuffs
- Lycra trim at the collar
- Compatible with a neck brace

*These off-road pants are one of **KENNY's** star products. They hardly need an introduction – riders have been enthusing about them for years. Although designed especially for enduro, bajas and rallies, **TITANIUM** pants are also the perfect fit for motocross. Their durability and comfort make them a must-have in the world of off-road pants.*

**PANTS**  
SIZES:

28>40US

- Ergonomic cut so you can ride freely in all conditions
- Crafted from high-density polyester, making your pants tough and durable, for longer
- Fully ventilated lining for optimum comfort
- Multi-directional stretch panels for complete freedom of movement

- Inner knee reinforcements to prevent abrasion and strengthen the resistance of the pants at the stress point between the knee protector and the bike
- Designed to withstand high temperatures, these pants also protect you from the engine
- Fully adjustable at the waist
- Silicone panel at the waist to keep your jersey tucked into your pants
- Sublimation printed for long-lasting quality

- First-class zip and stitching make these pants one of the most durable products on the market
- Breathable panels for excellent ventilation
- Thigh pocket with waterproof zip
- Crafted from high-density ripstop polyester so your pants stay durable, for longer
- Nylon stretch panel at the calves and ankles

Slim Fit

Breathable +

*This particularly high-tech jersey is designed for motocross. With its slim-fit design, it hugs close to the body and doesn't billow out. Drawing on cycling technology, this incredibly lightweight jersey has plenty of stretch so you can move exactly how you want to, and ventilation for optimum comfort when you're riding your hardest. Micro-Fresh technology keeps you feeling cool in hot weather.*

JERSEY  
SIZES:

S>3XL

- Regular slim fit
- Blend of high-tech stretch and Micro-Fresh fabrics on the back and sides and at the bottom of the sleeves
- 100% polyester
- Sublimation printed
- Hemmed at the bottom
- Lycra cuffs
- Lycra trim at the collar
- Compatible with a neck brace

PLEASE NOTE

*Given the cut of this jersey, you may need to choose one or even two sizes larger than the size that usually choose when buying from other brands, as well as your usual size of jersey in the KENNY range.*

**NEW**

# **PERFORMANCE** GLOVES

With their special **Nanofront®** nanofiber and multitude of technical innovations, the new **PERFORMANCE** gloves deliver the best grip possible.

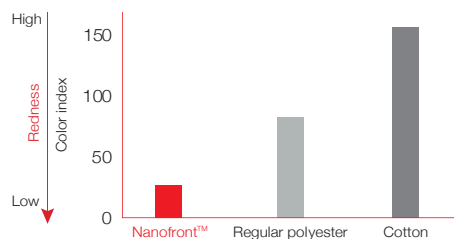

# NANOFRONT

**Unrivalled grip strength, even in wet conditions.**

Changes in the hue of the skin (Measured using Mexameter™ M X18)

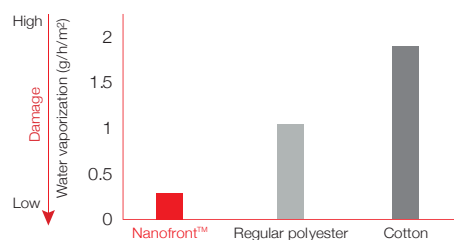

When the skin is damaged, it turns red as hemoglobin floods the blood vessels.

**Indisputable comfort, soft to the touch, slim fit. Minimise damage from abrasion.**

Changes in water vaporization through the skin (Measured using Tewameter™ TM300)

Removing the corneous tissue on the skin increases water vaporization from inside the skin.

**The fibre quickly absorbs and distributes sweat, while also preventing the body temperature from rising.**

This feature is inspired by biomimicry: the mechanism copies the densely packed hairs on a gecko's feet.

By weaving our ultra-fine **Nanofront®** fibre into a fabric with a fine, dense structure, the surface density increases tenfold compared with other fibres. This creates an uneven surface on a nanometric scale and generates a high frictional force.

What's more, this force is maintained even when the glove is wet with rain or sweat. Usually, moisture forms a layer between surfaces, preventing friction and causing slippage. **Nanofront®** absorbs moisture, however, and the frictional force is maintained. **Nanofront®** can therefore play a big part in user performance, in any environment.

# PERFORMANCE

These motocross/enduro gloves are the latest in the **KENNY** range.

The **PERFORMANCE** glove is bursting with technical features. It is very flexible and ergonomic, delivering unrivalled grip strength on the controls thanks to the use of **Nanofront®** technology.

Even the most demanding riders will love this model.

# PERFORMANCE

PROTECTION GEAR

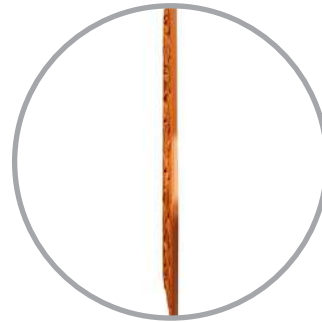

Featuring **D30®** technology, the new **PERFORMANCE** chest protector offers an extra layer of protection against injury caused by impacts. This is our lightest, toughest and most effective stone shield.

# D30® Protected

A unique design: engineered to ensure optimum safety.

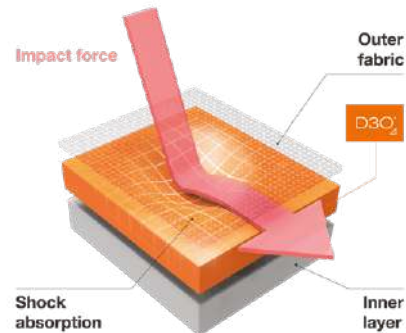

Ultra-thin: suits all body types.

Flexible: moves with you without getting in your way.

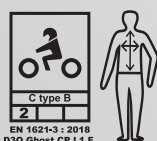

## How does it work?

**D30®** technology hardens upon impact and dissipates the energy received in the event of a shock, dramatically reducing the strength of the force transmitted to your body. **D30®** delivers the thinnest and most advanced impact protection you can buy.

# TITANIUM

The **TITANIUM D30®** protection jacket is a must-have for motocross and enduro riders who want protection and comfort. It's all down to the quality of the materials, which include breathable stretch mesh and next-generation D30® protectors. This protection gear allows you total freedom of movement so you can ride with precision. You'll also appreciate how discreet it is under your jersey or jacket, and, when you're riding hard or in hot weather, you'll love that it's so breathable.

**GEAR**  
S>XXXL  
251-1802000

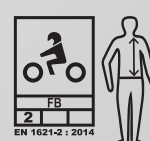

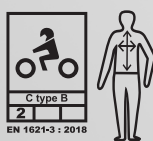

- Anatomical construction in a highly durable and breathable mesh structure
- With its Lycra base, it suits all body types and sits close to the skin to keep you feeling comfortable and cool
- Featuring very lightweight, ventilated next-gen protectors, with a D30® CP1 chest protector and a D30® Viper Air back protector.
- Chest protector certified EN 1621-3 level 2 thanks to the addition of the R-CHOC plate; back protector certified EN 1621-2 level 2
- The elbow and shoulder protectors are certified EN 1621-1
- Adjustable and removable support belt at the waist
- Zip closure
- FFM certified

# SHADOW

The **SHADOW** protection jacket offers outstanding value for money given its quality and the level of safety it provides. Certified EN 1621-3 level 2 for the chest protector and EN 1621-2 level 2 for the back protector, this protection gear also boasts EN 1621-1 protectors at the elbows and shoulders. POI® technology has been used to create these ventilated, flexible protectors. They come together to produce a very consistent product with a unique design.

The highly ventilated and elasticated mesh structure makes for a perfectly ergonomic product.

The **SHADOW** jacket is hands down a top-of-the-range product you'll love to wear in both summer and winter, whatever your preferred sport.

## TITANIUM

**TITANIUM**      **KNEE**      **BRACES**  
 SIZE:                      ONE                      SIZE  
 REF:    211-2401011

These pre-curved knee braces with their asymmetrical design are very comfortable to wear and can be adjusted to suit you using the Velcro straps. The design is based on a dual pivot system which makes it easier for you to move.

The padding is removable, so they are easy to maintain. The fabric is soft, comfortable, hypoallergenic and breathable. Certifications: EN 1621-1 2021

## HEXA

**HEXA**                      **KNEE**                      **BRACES**  
 SIZES:                      XS/S                      M/L                      XL/XXL  
 REF:    232-2515001

Thanks to our new HEXAFLEX technology, the HEXA knee brace delivers optimum comfort and a high level of protection for the knee and the tibia. Protection is assured through a pioneering system of hexagonal and pyramid-shaped modular panels, designed and made in France. This technology also delivers a high level of ventilation and enables the rider to move freely. Silicone bands at the thigh and the calf provide good abrasion resistance.
